OFF-ROAD FAMILIES

READY TO FIGHT

The engine of the XR 150 features a redesigned intake, cylinder head and exhaust system. There’ s more power from 5,000rpm up with smooth throttle response. And for a stronger, smoother low-rpm torque feel, the airbox is larger with tool-free access to the filter.

The XR 150 has new brand chassis and suspension package, engine upgrades to enhance power and drivability and sharp newlooks from redesigned lightweight plastics.

The XR 150 redefines incredible.

KEY FEATURES

DECIDE YOUR **STYLE**

Start with the best there is.

Then make it better; with the XR 150 machine as a base, the XR 250 already has an advantage. Just like the XR 150, it' s now smoother and sharper creating a formidable off-road weapon that' s fast over whatever ground you' re riding.

ADVENTURE EVERYWHERE

The powerful engine and unique air-cooled system give The XR 250 Black series excellent off-road capability and comfort. LED headlights provide good forward visibility, while the flexible mounted indicator lights are also bright LEDs. For instant readability the LED instruments use large white digits on a crisp black display.

The long-range autonomy that a big fuel tank allows, added to the sense of go-anywhere potential stored away in The XR 250 Black Series' comprehensive abilities. It is engineered to serve up a real taste of adventure to riders that want an easy to manage machine, whether for the daily commute, weekend tour or global journeys.

READY FOR ROAD AND TRAIL

Start with the best there is. Then make it better. The TRAIL 250L is now smoother, sharper and lighter creating a formidable off-road weapon that's fast over whatever ground you're riding.

The qualities that make it so good off-road – slim proportions, peppy throttle response, agile steering and supple suspension – also make it brilliant around town.

New, crisp, positive LCD instruments are easy to read. So, whether navigating rough city streets, or conquering new trails (or both in a day) the TRAIL 250L is a motorcycle built to explore.

KEY FEATURES

- 1400MM WHEEL BASE
- 132KG CURB WEIGHT
- 835MM SEAT HEIGHT
- 11.5L TANK CAPACITY
- LED INSTRUMENT DISPLAY

CUT LAP TIMES IT'S WHAT WE DO

The frame and rear fork have a carefully tuned rigidity between them; combined with increased low-speed compression damping settings for the front and rear suspension the result is improved stability, feel and accuracy while tracking through fast, bumpy turns.

It's what it's built for
